CPP Brief #2

- Dry Practice Skills (Part 2)
- Practice and Evaluation

Dry Practice Skills Part 2

- Full Presentation
- Engagement Techniques
- Reloads
- Search and assess
- Corrective action

Presentation

ELP

- From Alert Carry
- From Ready

CPP

- From Ready
- From Holster

- Holster presentation – two opportunities to sweep safety.
- Reinforces balance between speed and accuracy.

Presentation from Holster

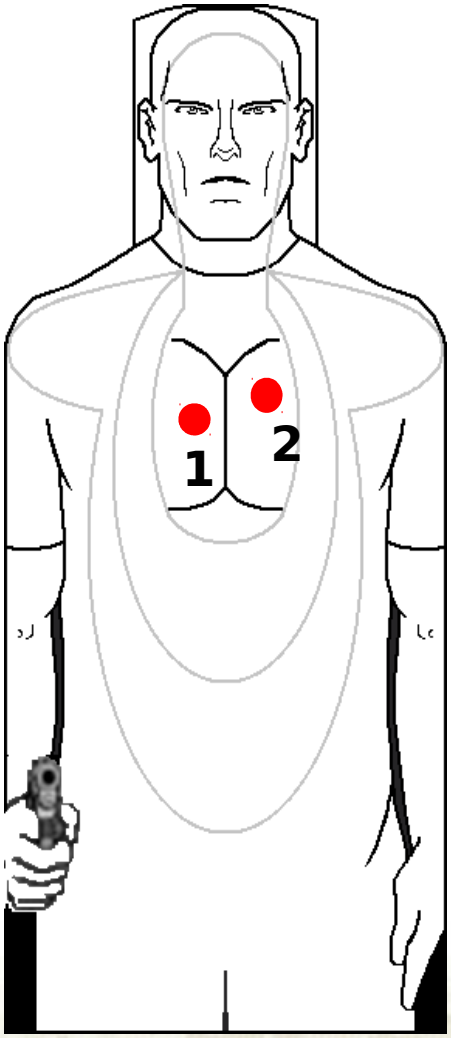
Engagement Techniques
Precision Shot

- Sight alignment is more critical the smaller the target and the greater the distance to the target.
- In these situations, the slow fire technique is used:

- Thumbcock the pistol for a single action shot.
- Close one eye and focus on the front sight.
- Fire one well-aimed, precision shot on the target.

Engagement Techniques
Controlled Pair

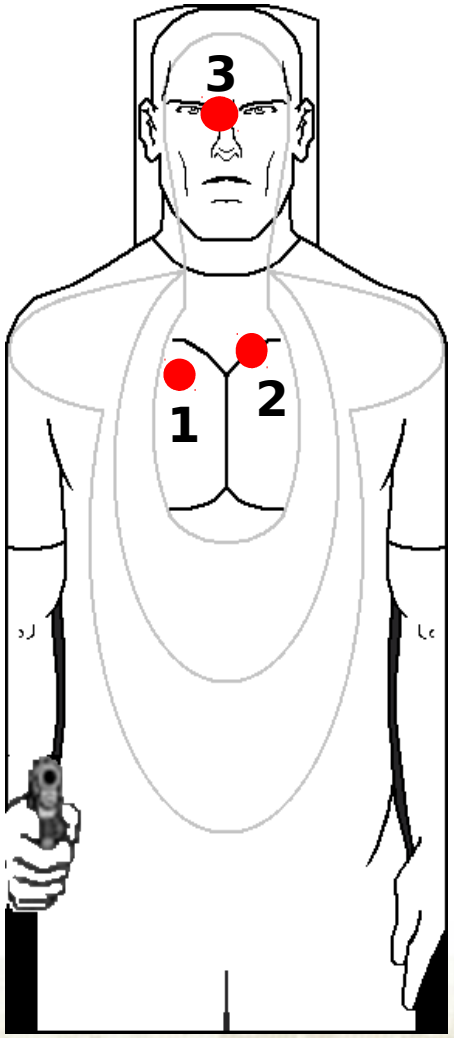
- Two aimed shots fired upon a target in rapid succession.
- A sight picture is acquired on both shots.
- Two shots increase the trauma (i.e., shock, blood loss) on the target.



Engagement Techniques
Failure to Stop

- If the target still poses a threat after two shots, conduct a Failure to Stop.

- Two shots fired to the chest followed by a slow fire, precision shot to an alternate aiming area.



Reloads

ELP

- Dry reload
- Condition 1 reload

CPP

- Speed reload
- Tactical reload

- Procedures are the same.
- Difference in workspace; CPP workspace is higher.

Search and Assess

Actions Taken Upon Assessing the Situation

If the threat has not been eliminated:

- Reengage.
- Seek cover.
- Seek support.

If the fight is over:

- Conduct a chamber check.
- Determine condition of weapon.
- Conduct a reload.
- Holster.

Corrective Action

ELP

- Remedial Action

CPP

- Corrective Action
  - Slide is forward
  - Visible obstruction

- CMC Corrective Action includes user serviceability inspection.
- Ties to shooter-induced stoppages and mechanical failure of pistol.
- Shows CMC why stoppage occurred and what to look for and how to teach shooter how to avoid stoppages.

Dry Practice and Evaluation

- MTC CMT's provide EDIP Instruction
- Scripts for EDIP Instruction provided in student binder
- T3 Students practice in groups.

- Final Evaluation (Thursday) after ISMT
